

TIB Annual Report

About TIB – Investing In Your Community

The Washington State Legislature created the Transportation Improvement Board (TIB) to manage state transportation grants to cities and urban counties. The TIB typically awards between \$50 and \$70 million per year in new grants. The TIB spends less than 1.5 percent of its revenue on administration, 98.5 percent goes out in grants to 320 local agencies.

TIB Programs

Urban Corridor Program: \$3 million to \$5 million grants for new or expanded urban streets that support economic development and concurrency.

Urban Arterial Program: \$1 million to \$3 million grants for street projects that improve safety and reduce congestion.

Sidewalk Program: \$100,000 to \$200,000 grants for construction or replacement of sidewalks along arterial streets.

Small City Arterial Program: \$500,000 to \$1 million grants for street projects that improve safety and physical condition of arterials in cities with a population less than 5,000.

Small City Preservation Program: \$50,000 to \$250,000 grants for resurfacing and seal coating public streets or sidewalks in cities with a population less than 5,000.

Accomplishments

Sustainability

The TIB added selection criteria for urban projects to encourage sustainable street design. The criteria provide a boost to projects that address energy utilization, recycling, non-motorized access, and low impact stormwater treatments. The new sustainability criteria is applied to all urban projects selected in November 2008 and beyond.

"Red Towns" Initiative

The TIB performance measures for the maintenance condition of

small city streets revealed nine towns with much of their street system in advanced deterioration. Lack of revenue and increased cost for restoration efforts has left many small towns behind in street maintenance. A strategic initiative within the Small City Preservation Program is funding a recovery of the Red Towns to bring the streets up to an acceptable condition.

Kittitas Paving Partnership

The TIB partnered with the city of Kittitas and the nearby Operating

Engineers Regional Training
Center to use town streets as a real-world training site for heavy equipment students learning to pave. Previously, students trained on strips of asphalt in the Training Center parking lot. The many graveled streets in Kittitas were paved while students honed their skills. The TIB provided funding for asphalt and fuel while the Training Center donated labor, equipment, and supervision of the students.

National Recognition for TIB

The TIB staff received three significant awards in the past year and the Executive Director was selected among the top 25 technology leaders in Government Technology Magazine. The TIB received recognition for innovations from the Council of State Governments and for public finance by the Government Finance Officers Association (GFOA) of the United States and Canada. GFOA awarded TIB its highest honor, the Award for Excellence in Government Finance. The TIB won the Washington State Quality Award for achievement in 2009.

Strategic Priorities

The TIB is a performance-managed agency. We use a data dashboard to track metrics on staff and project performance. Performance metrics are publicly available at www.tib.wa.gov/performance/dashboard. Programs, projects and initiatives are regularly modified in response to performance feedback.

Fuel prices and economic decline in 2008 and 2009 caused a marked decrease in revenue as project costs escalated. The TIB's performance measures helped the board prepare a comprehensive response. Most significantly, the TIB screened the entire project inventory to ensure appropriate progress to completion, and will suspend grants on some delayed projects. Still, economic conditions and cost escalation is causing a reduction in grant support to local transportation projects at a time when need is great.

The TIB identified the following program development objectives in the event of new funding.

Future Program Expansion Objectives

Invest in major corridors. Projects through major north/south and east/west corridors are large in size and expensive. To maintain effectiveness in the Transportation Improvement Account an infusion of \$25 million per year is necessary to address congestion issues and to support economic development in core areas.

Increase support to medium-sized cities. Cities with a population of 5,000 to 20,000 compete with agencies like Seattle and Tacoma, yet their fiscal capacity to maintain their infrastructure is low.

Improve sustainable design of street systems. The TIB took a large step forward by adding sustainability criteria into the urban project applications in 2008, but more needs to be done. If new funding was available, a sustainable streets grant program could make headway in reducing the environmental and energy impacts of both existing and new infrastructure.

Featured Projects

City of Newcastle – Coal Creek Parkway

East King County outgrew two-lane Coal Creek Parkway years ago. The TIB Corridor Completion Initiative (CCI) invested more than \$28 million to carry out the final phase to complete the corridor between Renton and Bellevue. The 2005 legislation passing the 9.5 cent gas tax made TIB funding possible for Coal Creek Parkway. With upcoming construction and increased congestion on Interstate 405, the completion of this project was imperative as this is the only major arterial connection parallel to the interstate.

City of Tacoma – D Street Overpass

The City of Tacoma's "D" Street Overpass project eliminated vehicle–train conflicts at a key connection to the Port of Tacoma industrial area. The now separated rail corridor is the busiest route for interstate freight and passenger trains in the Northwest. TIB funding of \$6 million joined with \$2 million from the Freight Mobility Strategic Investment Board (FMSIB) helped make this \$24 million partnership possible.

City of Kittitas

The TIB partnership with the town and the Operating Engineers Regional Training Center converted nearly a mile long gravel street to new pavement. Neighboring residents followed the paving crew through town offering thanks and praise to the training center students. The TIB paid \$112,000 for the paving, while the Operating Engineers donated labor and equipment saving the project 45 percent of the usual cost.

Walla Walla County – Myra Road

Collaboration among six local and state agencies made the development of Myra Road a reality for Walla Walla County. Myra Road provides an interstate truck route to Highway 12 and improves connectivity of the street network in the region. Significant truck traffic is diverted away from downtown Walla Walla. The \$17 million partnership included \$8 million in TIB funding and \$4 million from the FMSIB. The joint effort of TIB and FMSIB enabled "one stop shopping" where Walla Walla County billed TIB for both agencies' contributions and received one combined payment.

Financial

Revenue Fiscal Year 2008

Transportation Improvement Account \$ 43.3 million
Urban Arterial Trust Account \$ 57.1 million
Small City Pavement and Sidewalk Account \$ 1.9 million

The total ending fund balance in the accounts was just over \$29 million.

Expenditures

Total

Fiscal Year 2008 Expenditures

Transportation Improvement Account Capital Expenditures	\$38,486,463
Urban Arterial Trust Account Capital Expenditures	\$61,386,239
Small City Pavement and Sidewalk Account Capital Expenditures	\$1,856,953
Administrative Operating Expenditures	\$1,500,075

\$103,229,730

Future Challenges

Revenue is the most critical challenge for the future. As gasoline prices fluctuate, revenues become less predictable. A total decrease of \$67 million over the next six-year period is predicted for TIB funding. According to "The State of America's Cities"

nationwide survey released by the *National League of Cities*, almost seven in 10 respondents said the quality of roads, bridges, and airports are problems for their city with 29 percent saying conditions have worsened in the past year.

The TIB provided funding for the "Red Towns" Initiative to address the nine towns with the worst pavement condition in the state. Although this is a step forward, the amount of funding needed to address the entire problem is millions more than available revenue sources.
